

SALUBER

Multilayer Decontaminating Mat

A product of
genimpex

SALUBER is a mat used in all environments that require the total absence of contaminating agents and the preservation of high hygiene levels.

SALUBER

Multilayer Decontaminating Mat

The original DISPENSER FOLDER allows for comfortable handling and vertical storage. Each mat can be easily withdrawn leaving the remaining contents perfectly stored. (5 mats in each folder)

SALUBER is a **CE** marked medical disposable product.

Each mat is made up of 30 adhesive and numbered polythene sheets.

SALUBER provides unique protection with each mat being less than 2 millimeters in thickness.

The non-adhesive strip along one side of the mat allows for easy removal of each used layer.

A full length adhesive sheet on the bottom of the mat provides a firm grip either directly to the floor or to **SALU-PLATE**, the special anti-skid support frame.

SALUBER is available in BLUE, GREEN, WHITE

in the following sizes:

45 x 120 cm.	45 x 95 cm.
60 x 120 cm.	60 x 95 cm.
90 x 120 cm.	90 x 95 cm.

Other colours and sizes available upon request!

Thanks to its antibacterial glue, **SALUBER** captures and retains dust and bacteria. The best barrier against the growth and spreading of microorganisms.
